Experience:

- 2003-2009 **Owner, Mac-Guyver.com**
Supported home and small business computer users.
- 1990-2002 **Software Engineer, McCabe & Associates**
Improved and maintained TRUEchange, a software configuration management (CM) system.
Worked in all phases from design to support, on all parts of the product: server, middleware, three GUIs (X Windows, Visual Basic and Java) and scripting language and interpreter. Focused on business logic scripting and entity-relationship database access. Administered our own CM database. Maintained build, release, test and ship scripts.
- 1986-88 **Software Engineer, Programmed Intelligence Corporation**
Improved and maintained IQ, a database report writer product.
- 1982-85 **Systems Programmer, Datapoint Corporation**
Wrote software tools, GUI demos, and the stream I/O library that became their standard.
- 1981-82 **Programmer, Ted Nelson**
Implemented *Jot*, a word processor designed by Mr. Nelson.
- 1980-81 **Programmer, ACL, Inc.**
Wrote embedded sound and music software for video games.
- 1975-80 **Programmer, XRT, Inc.**
Wrote and maintained business and online funds-transfer software.
