

Wishing you happy holidays and our best wishes for 2007.

We got to Perkins Pond most weekends of the extended summer.

On the left is Anne taking minutes as secretary of the Perkins Pond Protective Association.

Anne's part-time job as Coordinator for Stow local access TV keeps her on her toes, working with volunteers and keeping track of just about everything happening in town. Besides town government meetings, they cablecast concerts, festivals, parades, garden club and historical society, school, library, museum, Scout, and Fire Dept events.

Robert is a software engineer developing Linux products at Stratus Technologies. The job is challenging, and just a short drive from home.

We sold our sailboat and bought a rowboat with a little 2 hp motor. Boat and bikes went to Cape Cod for a week this fall, where we explored the Bass and Herring Rivers and Nauset Marsh. For comfort, we still have our "Avocado" runabout at the cottage.
